

I would like to express my support to all forms of satellite radio broadcast... its the same as subscribing to tv channnels via satellite. This is a pay for use service and if we are willing to pay then the NAB should make changes to their broadcasts to attract listeners, not attack something they cant control. The majority of satellite listners were not tuning in to the over the air broadcasts because of quality and content deficiencies and satellite radio is just thing to force all manner of broadcasts to improve their FREE service not just force feed the public with inferior service.
